

Why you need the Shur-Kleen II Corn Cleaner:

- Why do you need a Shur-Kleen II corn cleaner?
- Corn burns better when it is clean going in!
- Corn stove manufacturers recommend using clean corn in your corn stove. Clean corn creates a more efficient burn and produces less ash. Cobs, stalks, silks, bees wings and other fines can clog, jam and damage moving parts and feeder assemblies of your corn stove. Dirty corn can also cause a lesser quality burning of the corn. A corn cleaner will pay for itself over and over again by increasing the amount of BTU's you can get from your clean corn.

About the Shur-Kleen II Corn Cleaner:

- The Shur-Kleen corn cleaner is the best corn cleaner on the market of its kind that efficiently and quickly cleans your corn for use with your corn stove.
- The Shur-Kleen II is built with the same quality as the Shur-Kleen I except it has one screen.
- The Shur-Kleen II comes with a vacuum attachment for maximum efficiency which sucks your lighter foreign material through the screen. Otherwise dust and bees wings tend to stay airborne and finally settle out with your corn.
- The Shur-Kleen corn cleaner was precisely designed for the corn stove owner. However it has now extended to the small flour shops and other niche markets. The screens on the cleaner may be exchanged with different size in a matter of minutes. . Your product will not plug up the screen like it does the wire screens. These screens have a lifetime warranty.
- The top screen will separate your larger pieces from your corn. It is easy to remove if you do not need it.
- It has 1/2" square hole and is angled to allow even flow.
- The cleaner is 34" tall and 14" x 14" square. It is easy and affordable to ship anywhere in the country.

Here is how the Shur-Kleen Corn Cleaner works:

- You simply load your product through the top screen, which will filter the larger pieces. The product flows down through the cleaner. In the process it flows over the screen on the inside, fines and bees wings drop through the screen and drop out on the bottom.
- This unit creates minimal dust and may be used in garage or basement.
- If you need a screen other than a corn screen it would be build to order. So shipping time would a factor.
